X/XI s. Fragments of **Lactantius Placidus'** commentary on the *Thebaid*

Twelve parchment fragments and four photographs of parchment fragments comprising three lost folia, written likely in Salzburg by two minuscule hands (the second hand wrote only fragment 14); [24–5x17–8]. The fragments appear not to be numbered; their order here is based on their sequence in the text. Fragments 5–8 (d.) are extant only in photographs made by Oellachers.

a. fragments 1r–2v: parts of the commentary of Lactantius Placidus to *Thebaid* 3.645–72 (the scholion to line 656 is wanting); and parts of the periochae to Book 4.

b. fragment 3r–v: part of the commentary

The recto may be to 3.719, but the fragment is too small for the text to be identified.

c. fragment 4r–v: part of the commentary on 3.685–93; 4.37–44?

d. fragments 5r–8v: according to Forstner, these fragments are too small and/or offer too many variants to be identified.

f. fragment 10r–v: part of the commentary on 4.306–70 and 411–48
